

$P_t^{wm}$   
 $P_t^{EV}$   
 $B_t^{EV}$   
 $P_t^{wm}$

为什么不是蓝线-0

RU: 增加发电 减少负荷

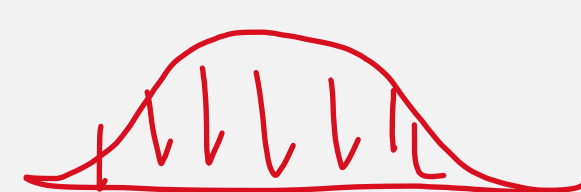

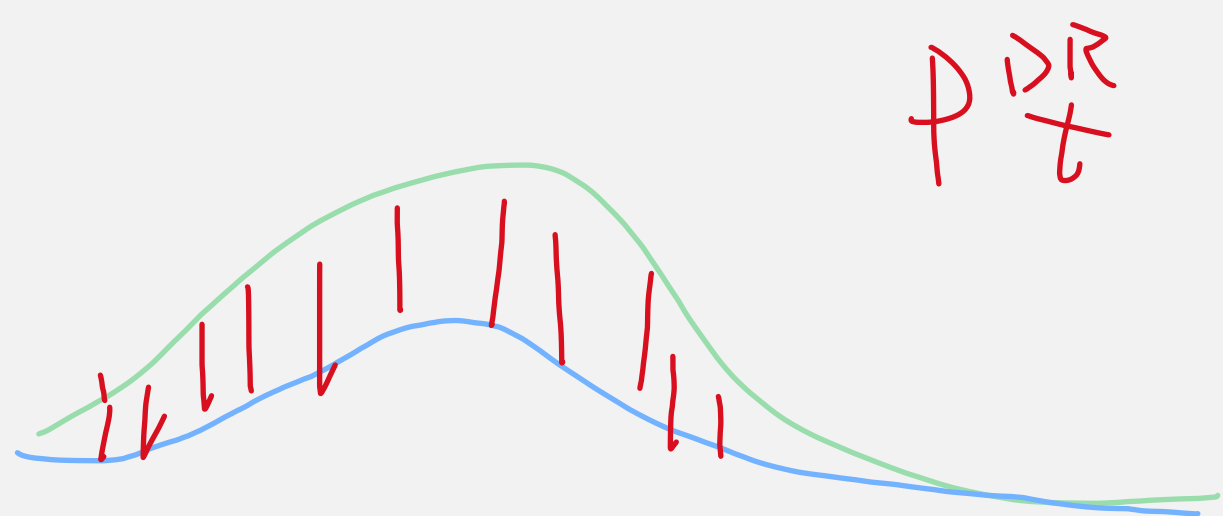

RD: 增加负荷 减少发电

$$P_t^{wm} = B_t^{EV} - P_t^{EV}$$

$P_t^{DR}$

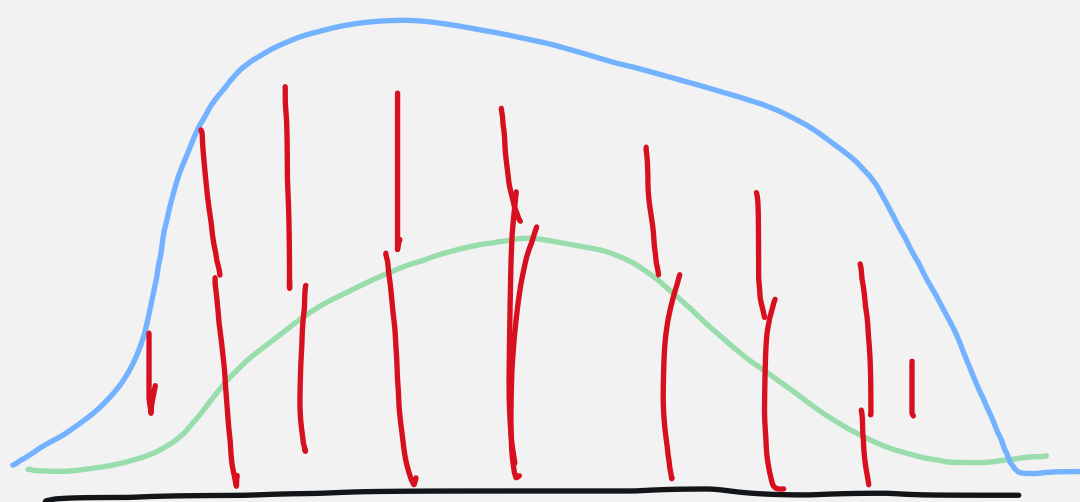

$C > 0$

kWh

$$P_t^{DR} = \sum_t P_t^{DR} \cdot C_t^{DR}$$

$C < 0$

$$P_t^{DR} = P_t^{EV} - 0 = P_t^{EV}$$

more

$$R_t^{DR} = \sum_t \max ( P_t^{DR} , -P_t^{EV} ) \rightarrow t \text{ GPR}$$
